

## DATA SHEET

## Hosted QuickBooks Desktops & Applications

The best place for your business-critical QuickBooks software and data is in the safety of a Canadian data center. Concero securely delivers hosted QuickBooks desktops and applications to hundreds of organizations across Canada.

All versions of QuickBooks are supported and can be accessed from any Internet connected device in either desktop or application mode. In desktop mode, QuickBooks can be used with other Windows applications, including Microsoft Office 365, installed on the same hosted desktop.

### BETTER SECURITY

Don't risk your business by keeping critical financial applications and data onsite. Using Citrix enterprise technology, remotely access QuickBooks running in a secure data center environment, featuring:

- Strong encryption for all data in transit and at rest
- Multiple levels of firewalls, intrusion detection, and access controls
- PCI and SSAE 16 SOC II information security certification
- 24x7 on-site security and bio-metric access controls
- Daily system and file backups with default 30-day retention

### BETTER ACCESS

Access your business data anytime, anywhere. Securely login to QuickBooks in desktop or application mode from any Internet connected device.

- Works with Windows, Apple, and Android
- Performs like installed on local workstation
- 99.99% service availability guarantee

### BETTER SUPPORT

Concero's has 10 years of experience delivering hosted QuickBooks desktops and applications. We proactively monitor and maintain all our hosted QuickBooks services 24x7x365. We'll get you set up and if there is ever a question or issue a technician at our Canadian service center will happily assist.
